NOTE FOR THE EUMARR-PROJECTGROUP

This is the complete codebook for all data we surveyed. For reasons of comparability the
dataset we provide excludes the groups not mentioned in the original project proposal (type 3
and 4) and the variables which were only surveyed in Switzerland.
1. Contributors

1.1. Academic institutions

Institute of Sociology, University of Zurich

The Swiss part of the project is carried out at the Institute of Sociology at the University of Zurich. The University of Zurich is the biggest university in Switzerland with seven faculties and a current enrolment of over 26,000 students. The Institute of Sociology is part of the Faculty of Arts which is by far the university’s largest faculty. Currently, about 300 students study sociology here as a major and 600 students as a minor. The department is characterized by theory-driven empirical social research and has a main focus on quantitative methods.

1.2. Research Team

The Swiss team is headed by Prof. Dr. Jörg Rössel, Professor of Sociology at the University of Zurich. The main researcher is Dr. Julia H. Schroedter, Postdoctoral Research Fellow at the University of Zurich. During certain periods, Daniel Just and Stefan Keller supported the project as research assistants. Daniel Just was in charge of the programming and implementation of the web survey. Stefan Keller assisted in conducting the web survey. Res Marti provided server side assistance and support.

The web survey was implemented by Daniel Just. It uses LimeSurvey\(^1\) (version 1.91), an open source software designed for standard surveys and online experiments. It features preconfigured question types, but is highly customizable with an extensive template system and JavaScript. It is used by many institutions around the world, including many universities.

Daniel Just has gained expertise in implementing web surveys as he has done so in previous surveys in the social sciences. He had implemented several surveys on the unipark.de platform and one major survey using LimeSurvey prior to joining the EUMARR project.

1.3. Funding agencies

The survey was conducted within the project "Toward a European Society: Single Market, Bi-national Marriages, and Social Group Formation in Europe (EUMARR)\(^1\)”, supported by the European Science Foundation (EUI2010-04221). The project examines trends since 1980 in the proportions of bi-national marriages between citizens of European Union countries to assess to what extent the European single market has contributed to an increase in such bi-national marriages and thus to the formation of a pan-European social group. Through the web survey, the project examines to what extent being part of a bi-national marriage is associated with different orientations to European integration, a

\(^1\) https://www.limesurvey.org
lowered sense of membership in the national community of origin, a stronger sense of belonging to Europe, and different lifestyles and worldviews.

The Swiss part of the project and the Swiss web survey has been funded by the Swiss National Science Foundation (SNSF) (No. of the Project: 105515_127818).

2. Sampling

2.1. Sample design

The sample in Switzerland was designed according to the general criteria allowing comparability with the rest of the national samples of the project but also allowing attaining representative samples of the selected partnership combinations. As shown in the next table, the samples are restricted to certain ages, cities or regions, and nationalities of the spouses.

In the Swiss case the official data source for the sampling was the Population Register of Zurich (date: April 18th 2012). The population register includes the total population of the city of Zurich. Out of this pool the sample was drawn.2

The sampling procedure was conducted in different steps: First, individuals in certain ages were selected; men being 30 to 45 years old and women aged 18 to 57 years. In opposition to the other countries, a wider age range of the female partner was chosen for the Swiss sample as it includes bi-national couples where one partner is a non-European national. Previous analyses have shown that on average partners in these couples feature a rather large age difference (this also applies to marriages between Swiss and Eastern Europeans). Accordingly, we would have selected rather untypical couples if we had gone for both partners being age 30 to 45. Moreover, all selected individuals had to have a (first) citizenship3 of the following countries: Switzerland (group 1: CH), Belgium, United Kingdom, Bulgaria, Denmark, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Austria, Poland, Portugal, Romania, Sweden, Slovakia, Slovenia, Spain, Czech Republic, Hungary, Cyprus (group 2 and group 5: EU-27), Albania, Andorra, Bosnia and Herzegovina, Croatia, Iceland, Kosovo, Liechtenstein, Macedonia, Moldova, Monaco, Montenegro, Norway, Russia, San Marino, Serbia, Turkey, Ukraine, Vatican City, Belarus (group 3: rest of Europe), Algeria, Brazil, Dominican Republic, Lebanon, Morocco, Peru, Philippines, Thailand, Tunisia, United States of America (group 4: selected non-European countries).

In the second step these individuals were matched together again on the level of households. Only households including at least two adults of opposite sex were selected. In households with more than two individuals with the given criteria, the priority was given to married partners. In case no registered partnership was present in a household, two

2 The sample pool includes all respondents of the city of Zurich except for individuals who had filed for an address ban. Unfortunately, the officials could not provide information about what percentage of the population in Zurich currently make use of the address ban.

3 An individual counts as Swiss if she/he has a Swiss citizenship. Beyond that she/he can have further foreign citizenships. In case an individual has more than one foreign citizenship, the first citizenship is the one she/he indicates at the registration office as her/his first.
individuals of opposite sex were chosen at random. In a third step the couples were classified by the five following groups.

(1) Both partners have a Swiss citizenship.
(2) One partner is Swiss, the other has a citizenship of one of the EU27 countries (Belgium, United Kingdom, Bulgaria, Denmark, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Austria, Poland, Portugal, Romania, Sweden, Slovakia, Slovenia, Spain, Czech Republic, Hungary, Cyprus).
(3) One partner is Swiss, the other has a citizenship of non-EU European country (Albania, Andorra, Bosnia and Herzegovina, Croatia, Iceland, Kosovo, Liechtenstein, Macedonia, Moldova, Monaco, Montenegro, Norway, Russia, San Marino, Serbia, Turkey, Ukraine, Vatican City, Belarus).
(4) One partner is Swiss, the other has a citizenship of one of the following non-European countries: Algeria, Brazil, Dominican Republic, Lebanon, Morocco, Peru, Philippines, Thailand, Tunisia, United States of America.
(5) Both partners have a citizenship of one of the EU27 countries.

In the last step, 2,500 couples in each group – wherever applicable – were selected at random. Within each of these couples (in each group) one individual was then drawn by a random sample. Table 1 summarizes the different steps of the sampling procedure.

4 These nationalities were chosen as they represent the countries were the foreign partners in bi-national marriages between Swiss and non-European partners are from most often in recent years (Top 5 of Swiss men and women respectively in Zurich).
The sample obtained included only name and mailing address of the individuals, which restricted the ways of contacting them. This has to be taken into account because the survey was online and the contact was made by letter post, which might have an impact on the response rates presented in section 5.

2.3. **Description of the sample obtained**

The sample obtained followed exactly the indications given in the application form. The final sample size was of 7,441 individuals, distributed by sex, marital status and type of partnership (different combinations of nationalities) as described in Table 2. In group 3 to 5 the sample equals the total population (with the required characteristics) in Zurich.

3. **Questionnaire**

3.1. **Questionnaire Design**

The questionnaire is conceived following several assumptions:

- There is only one respondent in a couple and information on the partner is provided by the respondent
- The questionnaire is almost identical for the four countries engaged in the project. Moreover, the teams were free to include additional questions.⁶

3.2. **Questionnaire Content**

The interview questionnaire is divided into the following sections:

1. Respondent’s background
2. Background of the partner
3. Relationship (Couple)
4. Children

---

⁵ The final sample was the second sample delivered by the Residents' Office as the first sample turned out not to be drawn completely according to our requirements.

⁶ The Swiss team added questions on the experienced stress of the respondents and on difficulties faced as a bi-national couple. Furthermore, a question was added in the section on identification concerning the respondents’ associations with Europe and another one in the section leisure and tastes on the individual’s opinion of certain composers and musicians.
At the end of the questionnaire the respondent was kindly asked to give his/her permission to be contacted for a follow-up interview. Respondents were also asked whether they would be interested or not in receiving a report of the results obtained by the research project. The last question concerned the participation in a raffle of iPads.

3.3. Translation of the English questionnaire

The different teams engaged in the EUMARR web survey, agreed to offer the questionnaire in different languages to the respondents: one or all official language(s) of each country plus English. In Switzerland, considering that the survey was conducted in the German-speaking part, the web survey could be filled out in English and German only. Respondents had the opportunity to switch the language at any point of the survey.

3.4. Pre-tests of the questionnaire

The Swiss EUMARR team piloted the questionnaire by providing 15 people with a questionnaire to fill out individually. An evaluation followed about the clarity and comprehensibility of the questions and the flow of the questionnaire. The respondents lived in bi-national or uni-national partnerships, had the Swiss and/or a foreign nationality, were in the restricted age frame and varied over educational levels.

The general remarks by the respondents referred mainly to problems of comprehension requiring changes in wording or additional response categories (such as “Don’t know”) or even changes in the order of the questions. Afterwards, the results obtained in the pre-tests were shared with the other teams in a joint meeting were the final version of the core English questionnaire was obtained.

4. Implementation of version web

4.1. Design of the web site and technical specificities

The implementation of the questionnaire on the web allowed introducing specific web resources to make it friendlier for users and reduce the time necessary for completing it. At the same time, these resources reduce the risk of error in self completion answers. The crucial resources were:

- Use of filters
- Use of rosters (including word recognition)
- Use of tooltips (e.g. indication of EU member states, definitions of friends)
- Use of tables
- Use of explanations in contrasting colors

It has to be noted as well, that we decided not to make all the questions compulsory. By making only some basic questions (plus those imposing a filter on the subsequent questions) compulsory, the respondents were given more flexibility and the risk of drop outs was intended to be reduced.

Compulsory questions in the online version of the Swiss questionnaire concern the following items: household together with partner, sex and nationality of respondent as well as of his/her partner, birth year and place of birth of respondent, meeting partner online or in real life.

The web application allowed the respondents to choose in which of the two languages (English, German) they wanted to answer the questionnaire. Furthermore, respondents had the opportunity to switch the language at any point of the survey. Respondents could also go back and forth in the questionnaire at any time (given the compulsory questions were answered). It was also possible to interrupt the web survey at any given time and to continue later on. Respondents simply had to log in again with their personal code and were directed to the last question they had filled in.

Finally, the web version allowed using some questions to reject respondents that do not fit the sample design. These questions are:
- CH0101  Do you have a partner/spouse who lives with you in the same household?
- CH0102  Are you male or female?
- CH0201  Is your partner/spouse male or female?

Respondents who did not have a partner living in the same household or those who lived together with a partner of the same sex, were immediately directed to an alternative exit where they were thanked for their participation and informed that they did not belong to the target population. They were then offered the opportunity to take part in the raffle (cf. 5.1).

4.2. Differences between paper and web

Apart from the guarantees offered by the use of rosters and tooltips (see screenshot 1 and 2 below), there are no major differences between the paper and the web version of the questionnaire. Minor differences, for instance, concern the filter questions regarding transnational networks, the countries visited and knowledge of certain composers and musicians. They are listed in the following:

1. Respondent’s background
   Question 1.1: The coding of male and female is reversed in the web survey.

2. Background of the partner
   Question 2.1: The coding of male and female is reversed in the web survey.
5. Languages

Question 5.5: In the web survey only a maximum of five foreign languages can be stated (paper version: maximum of six languages).

Question 5.6 & 5.7: Due to the coding of the paper version, there are no string variables for “other” language categories.

6. Time spent abroad

Question 6.2: In the online survey only a maximum of seven longer stays abroad can be stated (paper version: factual maximum of eight stays abroad).

Question 6.4: In the online survey question 6.3 is used as a filter. Only if respondents have visited Europe for short trips in some periods of their life, they are asked which countries those were. For the chosen countries there are then asked to indicate at which life stage that was (until 16th birthday etc.).

7. Family and friends

The filter questions concerning relatives, in-laws and friends in Switzerland, the EU and non-EU countries are different in the online survey. All networks and regions are asked at once and only positive answers (“yes”) could be given. See screenshot 3 below.

9. Free time and taste

Question 9.3: In the online survey there is a filter question on the composers and musicians known. Respondents are then asked how much they like the checked composers and musicians.

Question 9.8: In the online survey the ordering of the food dishes is different (see screenshot 4 below).

Screenshot 1
5. **Fieldwork (Data collection)**

5.1. **Incentive program**

The Swiss team agreed to offer participants the chance to take part in a lottery of an iPad. The lottery took place the 1st of October 2012 and the randomly selected winner was immediately contacted by email. The next day, the winner came to the department of Sociology, received and signed receiving the iPad.
5.2. Helpdesk for users

In the contact letter and reminders (see attachment) users were offered the possibility to contact the person in charge of the survey, Julia H. Schroedter, both by email and phone. This option was made use of extensively. Around 70 emails and 40 phone calls were answered, the majority of them raising problems to anonymity, the aim of the survey and questions on the target population. Many persons also called or send letters to inform us that the contacted person was abroad for a longer time period (or in few cases mentally ill). The important information was gathered. Moreover, respondents reported problems with the web survey and asked for advice. Mostly these problems referred to the fact that Java script could not be performed and installing a new version of the web browser often helped to solve the problem.

After the fieldwork was done, the website of the project www.eumarr.ch was also used to announce news related to the progress of the study.

5.3. Contact phases and duration of the fieldwork

The total duration of the fieldwork in Switzerland was almost four months. The sequencing of the whole process was as follows:

- June 6th to 8th 2012 (t1): Sending of the contact letters
- June 18th to 20th 2012 (t1 +12): Sending of the reminder letters
- July 9th 2012 (t1 + 33): Sending of the reminder postcard
- August 10th 2012 (t1 + 64): Sending of the third reminder (including paper version of the questionnaire in German)
- End of October 2012: Closing of the data collection

The contact letters and the first reminders were sent out staggered in order to prevent an overburden of the web survey. To cut down postage, all postal items were sent by B post which implies that the day of arrival is not exactly known. The postage might already arrive the very next day. The guaranteed maximum of arrival is the 6th working day after sending.

5.3.1. Contact letter

The 7,441 contact letters were sent in the two different languages in which the questionnaire is available. The letter included a brief summary of the project and simple instructions on how to complete the questionnaire. We also mentioned the incentive offered to the participants.

We pursued a strategy of reminders to heighten the response rate. The first reminder was sent out twelve days after sending the contact letters. The second reminder was a postcard which was sent 33 days after the first contact. Another reminder followed 64 days after the contact letter. The last reminder enclosed a paper version of the questionnaire in German as well as a stamped and self-addressed envelope for sending back the questionnaire. An English questionnaire was sent out if requested. The reminders were sent to all persons who either had not taken part in the survey to that date or who had not
completed the questionnaire until then. In the reminders, we also tried to encourage the latter to finish the survey.

6. Outcome fieldwork

6.1. Progress: Distribution of responses over time, language and mode

Figure 1 shows the distribution of the respondents who logged in at the website www.eumarr.ch of the survey over time. The maximum number of responses was obtained a few days after the first contact letters had been sent. This is clearly illustrated in figure 1 by the sharp rise in responses at the beginning of the survey. Every reminder led to an increase in the number of respondents, which is represented by the following three peaks. In the figure only the first logins are shown. Not represented is the effect of the reminders on those respondents who had discontinued filling out the survey and who were encouraged to finish it.

In table 4 we present the distribution of the language used by the respondents in the web survey. The results make clear that the English version of the questionnaire was used only by a minority of the respondents (13.7%). The paper versions of the questionnaire were all answered in German except for one.

Table 5 shows the distribution of the mode by type. It becomes obvious that group 1 and group 3 are more likely than the other groups to participate by paper. This might be associated with lower educational levels and less access to or less familiarity with the Internet. At least, lower educated respondents are less likely to participate online. Apart from the groups that were sampled, there are respondents (n=156) whose sample criteria are unknown. These respondents did not indicate the token we had sent to them which would have allowed identification of group membership. In all other cases, the token to log into the web survey could be used to identify the groups according to the sampling frame. Please be aware that the sampled groups are not identical to the types of partnerships individuals are actually involved in. This could only be expected for married persons. For individuals having the mentioned criteria (see above), especially if they were living together with more than one person, the “assumed” potential partner could have been only a housemate. As the citizenship of the actual partner may differ from the assumed person, the couple could have to be classified differently. The actual membership to a certain type of partnership (CH-CH; CH-EU27; CH-Other Europe; CH-Other non-European, EU27-EU27) has to be determined empirically taking account all citizenships of both partners.

6.2. Response rates

6.2.1. Differences in response rates by type

The total number of responses obtained was 3,105. And we obtained almost 1,000 responses each for the first two groups in which we are most interested (cf. table 6). However, 9.7% of the responses did not belong to our target population as the respondents were not living together with a partner or – in a few cases – shared a household with a partner of the same sex. The number of these cases is largest in the second group (partnerships between Swiss and EU27 citizens), which is not unexpected given a higher percentage of singles in the respective group. The percentage of married
individuals was higher in all other groups in the original sample. Other non-valid cases resulted from returned letters that indicated that the sampled addresses were not valid anymore. Moreover, some relatives informed us by mail, email or phone that the selected individuals were abroad for longer time spans.

The total response rate obtained is 37.7%, which is quite high for an online survey. The rate even rises up to 40.5% if all non-valid cases are taken into account. Nevertheless, the total rate hides important differences across the different types of respondents. The group with the highest response rate is the one including partnerships between two EU27 citizens from different countries. This might be due to the topic of the survey. Accordingly, individuals in partnerships of type 2 were also very likely to participate. The response rate of individuals in uni-national partnership is also slightly about 40%. It is possible that even in this group, individuals felt especially appealed by the survey as a lot of these respondents also live in “mixed” partnerships based on the origin of the partners (and not just their citizenships).

The response rate is especially low in group 3, followed by group 4. In these groups language problems might have been more pronounced than in the others. Moreover, individuals in these groups seem to be on average lower educated which could also be associated with a lower rate of participation (cf. section 5).

6.2.3. Evaluation of the response rates obtained

The response rates are higher than expected. However, there are reasons to think that they might be selective.

Limitation of the procedure online:
- Contact by letter post to get response online
- Problems to access internet
- Old versions of PCs/browsers (compatibility with JavaScript)

Limitations of the sample:
- Sampling households, not couples: not all the individuals in the sample are necessarily eligible because some might not be in a union or not with an eligible partner/spouse (even more pronounced in group 2 and 5 as these have a higher percentage of non-married individuals in the respective samples)
- Citizenship as criteria for the classification by type of partnership (i.e. group)
- Actual type of partnership often unknown

Possible selection bias:
- Language problems (cf. group 3 and 4)
- Different interest of individuals (more individuals with “migratory background” included, esp. group 1)
- Education (higher educated overrepresented)

6.3. Evaluation of the quality of responses

The quality of the responses has not yet been evaluated. First analyses indicate that the dropout rate in the online survey amounts up to almost 16% (380 of 2,423). These respondents did not submit their information at the end of the survey. It still has to be examined at what point in the survey most of these dropouts happened. Moreover, one might want to control for the effect introduced by the different procedures of the data collection (web and paper). As a start the variable can be controlled for in the analyses (only 14% of the total responses are in paper).
7. **Documentation data file**

7.1. **Variable labels**

LimeSurvey directly produced a raw SPSS dataset. The data had to be recoded because several variables were surveyed and saved as separate items (e.g. DNK category). This dataset was matched with a dataset containing the information of the paper versions of the questionnaire. In a first step both files were harmonized. In the combined dataset the names of the variables were created according to the number of the section in the paper version of the questionnaire (cf. Appendix), the number of the question and the number of response categories when necessary. The names of all variables start with “CH” in order to identify them as variables of the Swiss dataset. A list of all variables can be found in the Appendix.

7.2. **Variable codes**

The list of codes for each variable can be found in the file “Swiss Dataset Description.xls”. General rules applied for codification of response categories:

- 0  No
- 1  Yes
- -1  Don't know
- -2  Missing
- -3  Not applicable

All negative codes were set to missing in the SPSS dataset.

Cases in which respondents interrupted the completion of the questionnaire can be identified by the variable “STATUS”. Not completed implies that respondents did not press the "submit" button at the end of the survey. The variables corresponding to the questions not answered are most often coded as “missing”. But due to the programming of the web survey they are in some cases also coded as "not selected" (e.g. in questions were you could only give a positive answer, i.e. check “yes”) or as “not applicable” (e.g. in filter questions).

The codes for **countries and languages** were harmonized with the other EUMARR dataset and are now in line with the ISO 3166 codes. Some original information had to be adapted.

The following countries are concerned and were recoded as specified:

- Canary Islands → Spain
- Czechoslovakia → Czech Republic
- German Democratic Republic → Germany
- Kosovo → Serbia
- Tibet → China
- Union of Soviet Socialist Republics → Russian Federation
- Yugoslavia → Serbia

For languages the following modifications were made:

- Algerian → Arabic
- Brazilian → Portuguese
Croato-Serbian → Croatian
Moldovan → Romanian
Serbo-Croatian → Serbian
White Russian → Russian

7.3. Constructed variables

A few variables were constructed and added to the dataset in accordance with the agreement between the EUMARR partners. An overview of these variables and its coding can be found in Table 8.

Scientific survey on partnerships in Europe

Dear Mr. Müller,

The Institute of Sociology at the University of Zurich is currently organizing a scientific survey of the population of Zurich. The survey is part of a larger European project on lifestyles, attitudes and experiences of couples in Europe (EUMARR). In Switzerland the survey is financially supported by the Swiss National Science Foundation. We are contacting persons in Swiss relationships (with two Swiss partners) and in bi-national relationships (with two partners of a different nationality) to participate in this survey. We would like to ask your help to turn this research project into a success.

Among 7,000 persons in Zurich (and even more in further European cities) you have been selected to participate in the EUMARR study through a random sample from the population. The addresses were provided by the city of Zurich after a careful assessment of our application. Among other things, we want to learn how you and your partner got to know each other. Was it here in Switzerland or abroad? Are you often abroad? Do you frequently come into contact with people of other nationalities? How do you feel about Europe and Switzerland?

Your voluntary participation is very important for us to achieve reliable results. The quality of the EUMARR project can only be guaranteed if enough people participate. We also offer you the opportunity to give comments on some important social issues or raise concerns. Taking part in the survey also gives you a chance to win one of the four iPads we are raffling off among participants from all survey countries.

The survey is available on the Internet (see web address below) and will take you about 35 minutes. Completing the questionnaire is simple and anonymous. Because the survey is only accessible to selected persons of the scientific sample, we ask you to log in with your personal code.

Questionnaire: http://www.eumarr.ch
Personal code: 1et7xszs

On the next page of this letter you will find the answers to some frequently asked questions from persons who have previously participated in similar studies. If you still have concerns or questions about the survey, please feel free to contact us (see the address given above).

We want to thank you for your time and attention in advance and hope that you participate in this survey.

Yours faithfully,

Prof. Dr. Jörg Rössel

**Frequently Asked Questions (FAQ)**

**What is the purpose of this research?**

The EUMARR-project is a scientific study, carried out simultaneously in Switzerland, Belgium, the Netherlands and Spain. Its main goal is to gain insight into the living conditions and attitudes of groups in the population. The results of the study will be published in scientific journals and books, and will find their echo in the media, with policymakers and in the public opinion.

**How was I selected for this research?**

In scientific research it is important to obtain the cooperation of people with as diverse backgrounds and opinions as possible. For this reason we have selected you from the Population Register in Zurich using a scientific sampling method. This is the best guarantee to get to a balanced, representative sample of our target group in the population. Our sample in Zurich consists of (1) 2.500 persons belonging to a couple with two Swiss partners, and (2) 4.500 persons belonging to a couple with two partners of different nationalities, living at the same address with the male partner between about 30 and 45 years old.

**I believe I do not belong to the target group of the study. Do I also need to fill in something?**

Even if you believe that you do not belong to the target group of the study, for example because you do not have a partner, we still would like to ask you to register on the homepage of the internet questionnaire so we can see if and how we have wrongly assessed your situation. You too will then have the chance of winning an iPad.

**What if I do not have internet access or am not familiar with internet?**

If you do not have access to the internet or prefer to fill in the questionnaire on paper, you do not need to do anything for the time being. We will send you a paper questionnaire automatically within three weeks’ time.

**Is participation in this study voluntary?**

Yes. Your cooperation is voluntary. If you do not wish to participate, this will have no consequences for you. You also do not have to answer all questions. If there are questions that you would rather not answer, you can skip them. Still, we want to assure you again that your participation in this research is very important to us. Only if enough people participate, the results of the study are reliable.

**Is my participation in this research anonymous?**

Yes. By the use of a personal code, we can keep your answers to the web survey strictly separate from your personal information (name and address) for the whole duration of the study. At no time will this information be linked. When the phase of data collection is completed, the file containing your personal information will moreover be destroyed, making any linkages simply impossible. The completed questionnaire is processed anonymously. The results of the study will only be processed and reported in tables, so that no one will be able to retrace your answers.

Wissenschaftliche Studie zu Partnerschaften in Europa

Sehr geehrter Herr Müller,

Wie 7.000 Personen in Zürich (und noch mehr in anderen Europäischen Städten) wurden Sie in der Studie per Zufallsauswahl aus der Bevölkerung ausgewählt. Die Adressen wurden uns von der Stadt Zürich nach einer sorgfältigen Prüfung zur Verfügung gestellt. Unter anderem interessieren wir uns für die Frage, wie Sie und Ihr/e Partner/in sich kennengelernt haben. War das hier in der Schweiz oder im Ausland? Reisen Sie häufig in andere Länder? Haben Sie viel Kontakt mit Personen anderer Nationalität? Was denken Sie über Europa und die Schweiz?

Die Umfrage ist online verfügbar (siehe Weblink unten) und einfach und anonym auszufüllen. Sie wird etwa 35 Minuten dauern. Da die Umfrage nur für ausgewählte Personen dieser wissenschaftlichen Studie zugänglich ist, bitten wir Sie, sich mit Ihrem persönlichen Code einzuloggen.

Fragebogen: [http://www.eumarr.ch](http://www.eumarr.ch)
Persönlicher Code: 1et7xszs

Auf der nächsten Seite haben wir einige Antworten auf häufige Fragen zusammengestellt, die von Teilnehmern vorangegangener ähnlicher Umfragen gestellt wurden. Wenn sich Ihnen weitere Fragen stellen, kontaktieren Sie uns gerne (siehe die Kontaktdaten oben).

Wir möchten Ihnen schon jetzt herzlich für Ihre Zeit und Aufmerksamkeit danken und hoffen, dass Sie an dieser Umfrage teilnehmen.

Mit freundlichen Grüßen

Häufig gestellte Fragen (FAQ)

Was ist das Ziel und Zweck der Umfrage?

Wie wurde ich für diese Forschung ausgesucht?

Bei wissenschaftlichen Studien ist man auf die Beteiligung von Personen mit möglichst verschiedenen Hintergründen und Meinungen angewiesen. Aus diesem Grund haben wir Sie mit Hilfe eines wissenschaftlichen Auswahlverfahrens aus dem Register des Bevölkerungsamts der Stadt Zürich ausgewählt. Das ist die beste Garantie dafür, um eine repräsentative Stichprobe unserer Zielgruppe zu erhalten. Die Zürcher Stichprobe besteht aus (1) 2'500 Personen, die in einer Partnerschaft leben, in der beide Partner Schweizer sind, und (2) 4'500 Personen, die in einer Partnerschaft leben, in der beide Partner verschiedene Nationalitäten aufweisen. Der männliche Partner soll dabei im Alter von etwa 30 bis 45 Jahren sein.

Ich glaube, ich gehöre nicht zur Zielgruppe. Soll ich dennoch teilnehmen?

Auch wenn Sie glauben nicht zur Zielgruppe zu gehören, weil Sie zum Beispiel keinen Partner haben, bitten wir Sie trotzdem, sich auf der Homepage der Befragung zu registrieren. So ist es uns möglich zu erkennen, ob wir Ihre Situation bei der Stichprobenziehung falsch eingeschätzt haben. Bei der Registrierung erhalten Sie auch die Chance, an der Verlosung der iPads teilzunehmen.

Was mache ich, wenn ich keinen Internetanschluss habe oder den Umgang mit dem Internet nicht gewohnt bin?

Wenn Sie keinen Internetanschluss haben oder es bevorzugen, den Fragebogen auf Papier auszufüllen, brauchen Sie vorerst nichts tun. Wir werden Ihnen innerhalb der nächsten drei Wochen automatisch einen Papierfragebogen zustellen.

Ist die Teilnahme an der Studie freiwillig?

Ist meine Teilnahme an der Umfrage anonym?

Scientific survey on bi-national partnerships

Dear Mrs. Mustermann,

A few weeks ago we have solicited your collaboration in a study organized by the University of Zurich within the framework of the European EUMARR project on bi-national couples. We referred to the questionnaire at the weblink below and have given you a personal code to get access to the questionnaire.

Questionnaire: [http://www.eumarr.ch](http://www.eumarr.ch)

Personal code: 2at4ulkg

It is possible that you might have already completed the questionnaire and we sincerely thank you for that. If this is the case then you do not need to do anything else and we apologize for bothering you with mail.

If you have not filled in our questionnaire yet, we would still like to ask you kindly to spare some time for this study. Your participation is completely voluntary. But the more people participate in this study, the more reliable will be the results. Thereby, it is assured that the financial means for this study are deployed in a sensible manner.

If you do not have Internet access, you can use the paper questionnaire that will be sent to you in about two weeks.

Finally, we want to stress once more that all answers you provide are strictly anonymous and that at no time it will be possible to assign your answers to your personal information (name and address).

We thank you in advance for your cooperation, by which you take our research project a big step further.

Sincerely,

Prof. Dr. Jörg Rössel

Sehr geehrte Frau Mustermann,

vor einigen Wochen haben wir Sie angeschrieben und Sie um die Teilnahme an einer Studie zu bi-nationalen Partnerschaften gebeten. Diese Studie der Universität Zürich wird im Rahmen des europäischen EUMARR-Projekts durchgeführt und in der Schweiz vom Schweizerischen Nationalfonds finanziert. In dem Anschreiben haben wir Ihnen den Link zur Web-Umfrage und einen persönlichen Code (siehe unten) zur Teilnahme geschickt.

Fragenbogen: [http://www.eumarr.ch](http://www.eumarr.ch)
Persönlicher Code: 2at4ulkg

Wenn Sie an der Umfrage bereits teilgenommen haben, möchten wir uns hiermit herzlich bei Ihnen bedanken. Sie müssen in diesem Fall nichts unternehmen.

Wenn Sie keinen Internetanschluss besitzen, können Sie den schriftlichen Fragebogen verwenden, den wir Ihnen in etwa zwei Wochen zusenden werden.

Wir möchten noch einmal betonen, dass Ihre Antworten anonym behandelt werden und diese zu keinem Zeitpunkt der Studie Ihren persönlichen Informationen (Adresse und Name) zugeordnet werden können.

Abschließend noch einmal ein herzliches Dankeschön für Ihre Mithilfe. Durch Ihre Teilnahme helfen Sie, unser Forschungsprojekt einen grossen Schritt voranzubringen.

Mit freundlichen Grüßen

Scientific survey on partnerships in Europe

Dear Mr. Müller,

A few weeks ago we contacted you for the first time and asked you to participate in a study on partnerships in Europe. This University of Zurich study is part of a larger European project on lifestyles, attitudes and experiences of couples in Europe (EUMARR). So far, more than 2,000 persons in Zurich and even more in Barcelona, Madrid, Amsterdam, The Hague, Antwerp, and Brussels have participated. As you, they also have been randomly selected from their respective population registers.

As we have not received an answer from you to this date, we would like to invite you again to participate. The study will soon be completed and your voluntary participation is very important to us. The quality of the EUMARR project can only be guaranteed if enough people in different life situations take part. We would therefore greatly appreciate you taking time to participate now. If you are not in a partnership, please just answer the first question. This is also important information for us. Taking part in the survey also gives you a chance to win one of the four iPads we are raffling off among participants from all survey countries.

To participate online, please log in with your personal code (see below) on the website www.eumarr.ch. You will be directed to the questionnaire (English and German versions available). You do not have to fill in the questionnaire at once, you can resume at a later point in time (before September 3rd). To do so, you simply have to log in on the EUMARR website again and you will arrive at the position in the questionnaire where you stopped before.

Questionnaire: http://www.eumarr.ch
Personal code: 1et7xszs

If you prefer to complete a paper version of the questionnaire, you can use the enclosed questionnaire. In order to not waste paper, we have sent a German version only. If you prefer an English paper version of the questionnaire, please contact us at the address above and we will gladly send you a copy. You can return the completed questionnaire to us in the enclosed pre-paid envelope by September 3rd.

We want to thank you for your time and attention and hope that you participate in this survey.

Yours faithfully,

A2 Questionnaire (English, German)

English version
Questionnaire of the Swiss EUMARR-Study

Welcome to the EUMARR-Project which is supported by the European Science Foundation (ESF) and the Swiss National Science Foundation (SNF). We thank you for your participation in the EUMARR-Project to help us to find out more about the attitudes and life situations of couples in Europe. As explained to you in the introductory letter, all the information you provide remains strictly confidential.

Below you find a short instruction on how to fill in the questionnaire:

- Some questions in this questionnaire are factual. It is very important to us that you try to answer them as accurately as possible. Questions on tastes or opinions aim to measure what you personally think. Here, there are no "right" or "wrong" answers.

- Even if the survey appears very long: You won't have to answer all questions. We use filters to reduce the length of the questionnaire. This means that on certain answers you will be asked to skip some questions and continue at a position further down in the questionnaire. Therefore, please follow the instructions in italic letters:

  Example: Go to Question 3.

- Please take your time to read all possible answers carefully. Unless indicated differently, you can choose only one answer. Therefore, please tick the box next to the relevant answer:

  Example: Are you male or female?

<p>| | |</p>

<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Male</td>
<td>☐ 1</td>
</tr>
<tr>
<td>Female</td>
<td>☐ 2</td>
</tr>
</tbody>
</table>

- In a few cases, we ask you to fill in the answer by yourself. In these cases, please fill in your answer in block letters.

Finally, we would also like to remind you that we are raffling off four iPads among all interested participants in the EUMARR project. At the end of the questionnaire you can register yourself for the participation in the raffle.

Please send the completed questionnaire back to us until September 3rd 2012. You can use the enclosed envelope for a postage free sending.

Should you encounter any problem or if anything is not clear to you, do not hesitate to contact us (schroedter@soziologie.uzh.ch; tel: 044 635 23 53).

In name of the whole EUMARR-team, we thank you for your contribution to this project!

7. YOUR FAMILY AND FRIENDS

NOTE: From now on and for the rest of the questionnaire, we use the following definitions:
Relatives: brothers, sisters, parents, grandparents, uncles, aunts, cousins, nephews, and nieces.
In-laws: brothers, sisters, parents, grandparents, uncles, aunts, cousins, nephews, and nieces of your partner/spouse.
Friends: we understand people you feel at ease with, can talk to about what is on your mind, or call up for help.

If you have comments on the survey, please let us know in the following box. You can inform us about everything that struck you or went through your head while answering the questions. This can be suggestions, advises, additional information, concerns or simply your opinion.
In autumn we will have personal interviews with some respondents of this survey. In general, would you agree to participate?
Your agreement doesn't imply that we will have an interview with you. From all those who are interested we will chose a random sample of persons whom we will then ask again specifically.

Could you please enter your name and an address, telephone number or email address below, so we can possibly contact you for an appointment?
Please note that this information will be stored separately from your previous answers.

We would like to give you the chance to take part in our lottery of iPads. We will raffle four iPads among all participants of the EUMARR study. If you would like to participate, we need your permission to use your contact details for this purpose. If this is the case please check the following box.

☐ Yes, I agree that my data will be saved exclusively for the participation in the lottery.

Contact details:

After the completion of the study we will provide a short electronic summary of the main results. Are you interested in that? If so, please write down an email address which we can use to send the summary to.
Please note that this data will be saved separately from your previous information.

Below, please indicate your personal code which is mentioned in the introductory letter. The code is used to prevent multiple participations.

|___|___|___|___|___|___|___|___|

On behalf of the whole EUMARR project team we would like to kindly thank you for taking the time to participate in this study!

Please send the completed questionnaire back to us using the enclosed envelope. You won't need to stamp the envelope. If you belong to the winners of an iPad we will inform you as soon as the study is completed in all of the four participating countries.

Merci

Fragebogen der Schweizer EUMARR-Studie

Im Folgenden finden Sie eine kurze Erläuterung zum Ausfüllen des Fragebogens:

- Einige der Fragen beziehen sich auf Fakten. Es ist sehr wichtig für uns, dass Sie versuchen, diese so genau wie möglich zu beantworten. Fragen zum Geschmack oder zu Einstellungen zielen darauf ab, was Sie persönlich denken. Hier gibt es keine "richtigen" oder "falschen" Antworten.

- Auch wenn der Fragebogen sehr lang erscheint: Sie werden nicht alle Fragen beantworten müssen. Wir verwenden Filter, um den Fragebogen zu reduzieren. Das bedeutet, dass Sie bei bestimmten Antworten gebeten werden, einige Fragen zu überspringen und an späterer Stelle weiterzumachen. Folgen Sie dafür einfach der kursiven Anweisung:

  Beispiel: ⇒ Bitte weiter mit Frage 3.

- Bitte nehmen Sie sich die Zeit, alle Antwortmöglichkeiten sorgfältig durchzulesen. Sofern nicht anders angegeben, markieren Sie bitte nur eine der vorgegebenen Antworten. Bitte kreuzen Sie dazu das Kästchen neben der für Sie zutreffenden Antwort an:

  Beispiel: Geben Sie bitte Ihr Geschlecht an.

<tbody>
<tr>
<td>Männlich</td>

<td>☑</td>
</tr>
<tr>
<td>Weiblich</td>

</tr>
</tbody>
</table>

- In einigen Fällen bitten wir Sie, Ihre Antwort selbst einzutragen. Bitte verwenden Sie in diesen Fällen möglichst Druckbuchstaben.

Zum Schluss möchten wir Sie noch daran erinnern, dass unter allen interessierten Teilnehmerinnen und Teilnehmern des EUMARR-Projektes vier iPads verlost werden. Am Ende des Fragebogens können Sie sich zur Teilnahme an der Verlosung eintragen.

Bitte senden Sie den ausgefüllten Fragebogen bis zum 03.09.2012 in dem beiliegenden Couvert portofrei an uns zurück.

Sollten Probleme auftauchen oder Sie Fragen haben, zögern Sie bitte nicht, mit uns Kontakt aufzunehmen (schroedter@soziologie.uzh.ch; Tel.: 044 635 23 53).

Im Namen des gesamten EUMARR-Teams bedanken wir uns herzlich für Ihre Teilnahme an diesem Projekt!

Wenn Sie Kommentare zur Umfrage haben, nutzen Sie bitte das folgende Feld. Sie können uns hier alles mitteilen, was Ihnen bei der Umfrage aufgefallen oder durch den Kopf gegangen ist. Das können Anregungen, Hinweise, Zusatzinformationen, Bedenken oder einfach Ihre Meinung sein.
Wir werden im Herbst noch persönliche Interviews mit einigen Teilnehmer/innen dieser Umfrage durchführen. Wären Sie grundsätzlich einverstanden, daran teilzunehmen?

Ihr Einverständnis bedeutet nicht, dass wir ein Interview mit Ihnen führen werden. Unter allen Interessierten werden per Zufall einige Personen ausgewählt, die wir dann noch einmal konkret anfragen werden.

Wenn ja, könnten Sie uns Ihren Namen und eine Adresse, Telefonnummer oder E-Mail-Adresse angeben, unter der wir Sie gegebenfalls zwecks einer Terminvereinbarung erreichen können?

Bitte beachten Sie, diese Daten werden getrennt von Ihren zuvor gemachten Angaben gespeichert.

Wir möchten Ihnen gerne die Möglichkeit geben, an unserer iPad Verlosung teilzunehmen. Unter allen Teilnehmern und Teilnehmerinnen der EUMARR-Umfrage verlosen wir nach Abschluss der Studie vier iPads. Wenn Sie daran teilnehmen möchten, benötigen wir Ihr Einverständnis, dass wir Ihre Kontaktdaten zu diesem Zweck verwenden dürfen. Bitte kreuzen Sie in diesem Fall das folgende Kästchen an und notieren Sie Ihren Namen und Ihre Anschrift oder eine E-Mail-Adresse.

Bitte beachten Sie, diese Daten werden getrennt von Ihren zuvor gemachten Angaben gespeichert.

Ja, ich bin damit einverstanden, dass meine Daten ausschließlich zur Teilnahme an der Verlosung gespeichert werden.

Kontaktdaten:

Nach Abschluss der Studie werden wir eine elektronische Kurzzusammenfassung der Hauptergebnisse zur Verfügung stellen. Sind Sie daran interessiert? Wenn ja, geben Sie bitte eine E-Mail-Adresse an, an die wir die Zusammensfassung senden können.

Bitte beachten Sie, dass diese Daten getrennt von Ihren zuvor gemachten Angaben nur zu diesem Zweck gespeichert werden.

Im Namen des gesamten EUMARR-Teams möchten wir Ihnen herzlich danken, dass Sie sich die Zeit zur Teilnahme an unserer Studie genommen haben!

Bitte schicken Sie den Fragebogen in dem beiliegenden Rückantwortcouvert an das Soziologische Institut der Universität Zürich. Eine Briefmarke brauchen Sie nicht. Wenn Sie zu den Gewinnern eines iPads gehören, werden wir Sie benachrichtigen, sobald die Studie in allen vier beteiligten Ländern abgeschlossen ist.
